

Saves Time. Saves Lives.

Experience the fastest, most efficient and easiest-to-use technology ever to be utilized for colonoscopies. V3D-Colon. Created and developed by Viatronix, V3D-Colon is a full featured, automated diagnostic imaging system, providing physicians with the tools to accurately see more patients and more importantly, save more lives.

With a simple, easy-to-use navigation interface optimized for examining 100% of the colon, V3D-Colon provides a seamless integration between automatic and interactive navigation modes. There is no setup or extensive computer knowledge required, patients are automatically pre-processed, physicians have the advantage of Real-Time Volume Rendering and results are generated only minutes after the exam.
